

Lab # 2

Due: by midnight Thursday, Mar. 8, 2018. You will submit this lab through TURNIN. This lab will NOT be accepted after midnight, Sunday, Mar. 11, 2018. A 10% per day late penalty will apply. You should work independently on this lab.

To receive credit for the lab you must zip and submit all required files through TURNIN by the due date.

Requirements:

This lab should provide the same basic functionality as Lab #1 except for the differences described below.

- Use jQuery instead of strictly using JavaScript, as specified in Lab #1, to validate the form and calculate costs.
- Use a CDN to access the jQuery framework required.
- Instead of validation on form submission, modify the lab to validate entries as soon as each field is input by the user. When the user's entry is in error, indicate the error, clear the field, and place focus back on the field in error for correction.
